

Peny ki gin ma iye (achwi iremo)

Achwi woto nining iremo?

Achwi bedo iremo ikom wa, achwi neko gin iremo wa me gilowngo CD4 cells. CD4 cells eni gu lwenyo two ikomwa. Achwi jwiko cells eni ki dano me tye ki achwi kom gi fud pe gi twero ka lwenyo two. Ka acwhi woto ikom ngat apat me pe tye kede, ngat eni twero ka two bene. Yo acel me ngat twero ka mako two tye ika gamo remo. Ilobo weng 5-10% me dano me two, ubedo dye gamo remo.

Ka bwutu tye yo madit me mako two, ngo mako ne?

Achwi iremo makato, mako cel me dano adek. Gum ma dit tye ki dano me poko libira(ka tucu yat). kadi awene achwi guweko twolo too, libira pyene. Dong ngat mukene me tic kwed libira enuni mako two. Dano me two remo ki dano me gamo remo iot yat, bene tye ki gum me mako two ento kwane fud tye piny pien gwokke tye.

Dactari ki dano me tic kwed remo me jo mu two, kongi?

Gin ma iye ka dactari utucu kome ki libira me gi tic kom ngat mu two, tye gwokke mo me gu timo. Acel ka bedo, ka gamo yat me anti-AIDS lacen gin kuman, ka gwoko piny gum me two. Tam pol mukene tye iot yat kom jami kuman.

Ngo ma gi tye ka time iyo eni(achwi iremo)?

Calo waneno anyim, remo weng iot yat cito iporo anyim miyo ne bot dano me mito ne. Gu tye ka miyo lutuco yat tam ka weko poko libira, nyo ka tic ki libira acel jwi, bene tic madit fud tye ka miyo gi programme me miyo gi libira manyen. Ka libira pe tye gu miyo gi tam ka tic kwed jami pat calo (latek mo, jiko, pamba ki syringe) me gi tedo. Lobo mo gu jwiko loc ka weko dano me tye ki libira labongo gamo ne wa dactari kabedo mot.
